

# MAGIC SUP

The Walden Magic SUP range integrates the famous original Magic Model rocker combined with concaves for stability and V-bottom for turning. This makes the ride loose yet stable and turning is easy.

Completely versatile for surf or cruising flat water. As stable as a much longer board with the width and concave. All models feature traction which is glued and vacuum bagged onto the deck of the board. In addition the 9'11 and 10'10 features a step deck design to maximise volume without compromising performance. All Walden SUPs comes with a 9" centre fin and FCS SW side fins

New to the range, the 9'4" model is designed with the advanced SUP surfer in mind. It is can also be used by lighter intermediate surfers that do not need the flotation of a larger board.

9'4"

9'11"

10'10"
